Organizing Committee

Chairman
Prof. G. K. Rath
Secretary
Dr. Harit K. Chaturvedi
Treasurer
Dr. Ashok K. Vaid
Joint Secretary (AROI)
Prof. P. K. Julka
Dr. Rajesh Vashishtha
Joint Secretary (IASO)
Prof. Chintamani
Dr. S. V. S. Deo
Joint Secretary (ISMPO)
Dr. Shyam Aggarwal
Dr. D. C. Doval
Joint Secretary (ISO)
Dr. Kapil Kumar
Dr. A. K. Anand
Members (OF)
Dr. Harsh Dua
Dr. Arvind Chaturvedi
Dr. K. T. Bhowmik
Dr. Sameer Kaul
Dr. Bhawna Sirohi

Scientific Committee

Chairman
Dr. (Col.) R. Ranga Rao
Members (AROI)
Dr. S. Hukku
Dr. S. C. Sharma
Dr. Ramesh Bilimagga
Members (IASO)
Dr. Sanjeev Misra
Dr. R. Rajaraman
Dr. D. Savant
Members (ISMPO)
Dr. Hemant Malhotra
Prof. Govind Babu
Dr. G. S. Bhattacharya
Members (ISO):
Dr. Sanjay Sharma
Dr. Ravi Dev
Dr. Anita Borges
Members (OF)
Prof. Lalit Kumar
Prof. Chitra Sarkar
Dr. Sapna Nangia
Dr. Rajiv Agarwal
Dr. Pankaj Dougal

First Indian Cancer Congress 2013- A Unique Platform for Knowledge Sharing

Benefitting Medical Community and Society

Confluence of Onco-Associations and Affiliates to Redefine Cancer Care

NEW DELHI, 17 September 2013 – The first Indian Cancer Congress (ICC) will be held from 21st to 24th November 2013 at the Kempinski Ambience Hotel in New Delhi. Experts from surgical, medical and radiation oncology will join forces with radiologists, pathologists, scientists, physicists, and ancillary service providers such as oncology nurses, technicians, and paramedics to comprehensively address various facets of cancer care. Additionally, patients, caregivers, advocacy groups, and NGO's will also have an opportunity to share the platform with policy makers.

Hosted by the Association of Radio Oncologists of India (AROI), the Indian Association of Surgical Oncology (IASO), the Indian Society of Medical and Pediatric Oncology (ISMPO), the Indian Society of Oncology (ISO), and the Oncology Forum, the Congress enjoys the support of over 25 professional bodies, 100 cancer institutions, and 7 leading international associations involved in cancer care. With a confirmed faculty of over 250 global thought leaders, ICC has already received 3,000 delegates registration for the conference and 5,000 delegates are expected to attend. **This international conference will act as a catalyst for further research, treatment and dissemination of knowledge in the field of cancer.**

Addressing the media today, Dr. G.K. Rath, Chairman, Organizing Committee ICC 2013, stated, "We are excited to lay the foundation of one of the most empowering gatherings on cancer in India in the form of Indian Cancer Congress. Slated to be the biggest oncology event ever in India, the Congress will strive collectively to face the daunting challenge of cancer and showcase the lead India has taken in cancer research. It will establish India as an emerging leader in cancer care and will inspire both experts and the new generation to take on cancer with new learnings from their colleagues across the world."

Over 300 leaders from across the country have worked together to create a very exciting scientific program. The Congress has received 1,740 abstracts from the scientific community across the world. The ICC will also offer 400 hours of deliberations during the 4 days of the event, with 10 pre-conference workshops planned in the sidelines. Oncotech, an exhibition of state of art technology, will display a range of equipment required for setting up a full-fledged cancer hospital.

35th Annual Conference of AROI

27th Annual NATCON IASO

18th Annual Conference of ISMPO

15th Biennial Conference of ISO

The conference will benefit not only cancer care providers, but also society as a whole. According to the ICC, there are 3,300,000 cancer patients in India. Each year, 600,000 of those patients die and doctors diagnose 1,000,000 new cancer cases. India bears a disproportionate amount of cancer cases and possesses 50% of the world's oral cancer cases. With this immense public need in mind, the final day of the conference speaks to the non-medical community, including volunteers, patients, families of victims, and the general public.

This pioneering conference will promote and showcase all types of cancer research in India. Highlights of the program include breast oncology, surgical management of sarcomas, hematology, head and neck oncology, pediatric oncology, thoracic oncology, palliative care, preventive oncology, imaging and radiology, gastrointestinal and HPB cancers, pathology, genitourinary oncology, nuclear medicine, geriatric oncology, gynae oncology, and nursing oncology.

Dr. Harit K. Chaturvedi, Organizing Secretary of the ICC, commented, "The scientific deliberations during the Congress and strengthening of collaborations between different arms of oncology are directed towards better patient care, better clinical outcome and most effected treatment. The treatment today is out of the reach of the significant section of our society. We hope this Congress will come out with well-defined strategies."

Four days of programs as well as a day of pre-conference workshops on 20 November await the delegates. The programs will consist of a mixture of poster presentations, panel deliberations, round table discussions, and lectures, with an emphasis on discussions and audience participation. The ICC will help care providers implement new ideas and research into their practice as well as further the discussion of best practices to curtail the rapid growth of cancer cases and provide quality care to patients.

About the Indian Cancer Congress 2013

The Indian Cancer Congress 2013 is the first ever meeting of oncologists, scientists, allied specialists, ancillary service providers, advocacy groups, and policy makers in South East Asia to comprehensively address cancer care from prevention to palliation. ICC has partnered with over 25 professional bodies, 100 cancer institutions, and about 10 international associations involved in cancer care. This affiliation will strengthen the purpose of the ICC to reach out to all involved in the fight against cancer in different ways. This will pave the way for a new dawn in the Indian cancer landscape. For more information, please visit www.indiancancercongress2013.org.
